

Lot #28

1940s DeLaval

Cream Separator

*Donated by Ted Adkins,
Kentucky*

Step back in time with this beautifully preserved De Laval Junior No. 2 Cream Separator, a classic piece of American dairy history from the 1940s. This manual cream separator was a staple on small farms and homesteads, known for its reliability, precision engineering, and durable cast iron construction.

Model: De Laval Junior No. 2

Capacity: Separates up to 225 pounds of milk per hour

Operation: 65 revolutions of the hand crank per quart of cream

Era: Circa 1940s

Material: Heavy-duty cast iron and tin
